PERGAMON

Neural Networks 14 (2001) III–XV

Neural Networks

www.elsevier.com/locate/neunet

Contents Volume 14, 2001

NEURAL NETWORKS

Volume 14, Number 1 January 2001

CONTENTS

S. Grossberg, M. Kawato, J. G. Taylor — xi — Editorial

Neuroscience and Neuropsychology

T. J. Anastasio — 1 — A pattern correlation model of vestibulo-ocular reflex habituation

Mathematical and Computational Analysis

J. A. K. Suykens, J. Vandewalle, B. De Moor — 23 — Optimal control by least squares support vector machines

V. Cherkassky, X. Shao — 37 — Signal estimation and denoising using VC-theory

M. Sugiyama, H. Ogawa — 53 — Incremental projection learning for optimal generalization

M. Sugiyama, H. Ogawa — 67 — Properties of incremental projection learning

A. Nakashima, A. Hirabayashi, H. Ogawa — 79 — Error correcting memorization learning for noisy training examples

A. Blanco, M. Delgado, M. C. Pegalajar — 93 — A real-coded genetic algorithm for training recurrent neural networks

J. Park, H.-Y. Kim, Y. Park, S.-W. Lee — 107 — A synthesis procedure for associative memories based on space-varying cellular neural networks

G. Lee, N. H. Farhat — 115 — The Bifurcating Neuron Network 1

133 — *Current Events*

I — INNS/ENNS/JNNS Membership Application Form

II — Instructions to Authors

Volume 14, Number 2 March 2001

CONTENTS

Mathematical and Computational Analysis

J.-J. E. Slotine, W. Lohmiller — 137 — Modularity, evolution, and the binding problem: a view from stability theory

C.-S. Leung, K.-W. Wong, P.-F. Sum, L.-W. Chan	**147**	A pruning method for the recursive least squared algorithm
P. Courrieu	**175**	Two methods for encoding clusters
N. Mai-Duy, T. Tran-Cong	**185**	Numerical solution of differential equations using multiquadric radial basis function networks
		Engineering & Design
T. Shibata, S. Schaal	**201**	Biomimetic gaze stabilization based on feedback-error-learning with nonparametric regression networks
C. Dang, L. Xu	**217**	A globally convergent Lagrange and barrier function iterative algorithm for the traveling salesman problem
A. Nikov, S. Stoeva	**231**	Quick fuzzy backpropagation algorithm
	245	***Current Events***
	I	INNS/ENNS/JNNS Membership Application Form
	III	Instructions to Authors

Volume 14, Number 3 April 2001

CONTENTS

		Neural Networks Letter
T. Chen, S. i. Amari	**251**	New theorems on global convergence of some dynamical systems
		Invited Article
J. Lampinen, A. Vehtari	**257**	Bayesian approach for neural networks—review and case studies
		Neuroscience & Neuropsychology
J. Storck, F. Jäkel, G. Deco	**275**	Temporal clustering with spiking neurons and dynamic synapses: towards technological applications
		Mathematical & Computational Analysis
V. J. Hodge, J. Austin	**287**	An evaluation of standard retrieval algorithms and a binary neural approach
C. Quek, K. B. Tan, V. K. Sagar	**305**	Pseudo-outer product based fuzzy neural network fingerprint verification system
		Engineering & Design
E. Granger, M. A. Rubin, S. Grossberg#P. Lavoie	**325**	A What-and-Where fusion neural network for recognition and tracking of multiple radar emitters

Technology & Applications

L. B. Shams, M. J. Brady S. Schaal 345 Graph matching vs mutual information maximization for object detection

B. Ayrulu, B. Barshan 355 Neural networks for improved target differentiation and localization with sonar

375 *Current Events*

I INNS/ENNS/JNNS Membership Application Form

III Instructions to Authors

Volume 14, Numbers 4–5 May 2001

CONTENTS

Psychology and Cognitive Science

Y. Wada, Y. Kaneko, E. Nakano, R. Osu M. Kawato 381 Quantitative examinations for multi joint arm trajectory planning—using a robust calculation algorithm of the minimum commanded torque change trajectory

Neuroscience & Neuropsychology

M. Watanabe, K. Nakanishi, K. Aihara 395 Solving the binding problem of the brain with bi-directional functional connectivity

Mathematical & Computational Analysis

J. M. Cano Izquierdo, Y. A. Dimitriadis, E. Gómez Sánchez J. López Coronado 407 Learning from noisy information in FasArt and FasBack neuro-fuzzy systems

F. Vivarelli C. K. I. Williams 427 Comparing Bayesian neural network algorithms for classifying segmented outdoor images

F. Schwenker, H. A. Kestler, G. Palm 439 Three learning phases for radial-basis-function networks

A. Nakashima, H. Ogawa 459 Noise suppression in training examples for improving generalization capability

E. Trentin 471 Networks with trainable amplitude of activation functions

M. Güler 495 A model with an intrinsic property of learning higher order correlations

Engineering & Design

M. M. Campos G. A. Carpenter 505 S-TREE: self-organizing trees for data clustering and online vector quantization

S. Drăghici 527 The constraint based decomposition (CBD) training architecture

Technology & Applications

F. H. Hamker 551 Life-long learning Cell Structures—continuously learning without catastrophic interference

A. Mitiche, M. Lebidoff 575 Pattern classification by a condensed neural network

581 *Current Events*

I INNS/ENNS/JNNS Membership Application Form

III Instructions to Authors

Volume 14, Number 6–7 July/September 2001

CONTENTS

2001 Special Issue: Spiking Neurons in Neuroscience and Technology

S. Grossberg, W. Maass, H. Markram 587 Introduction

G. L. Gerstein, K. L. Kirkland 589 Neural assemblies: technical issues, analysis, and modeling

W. Gerstner 599 Coding properties of spiking neurons: reverse and cross-correlations

H. Uchiyama, K. Goto, H. Matsunobu 611 ON–OFF retinal ganglion cells temporally encode OFF/ON sequence

A. van Schaik 617 Building blocks for electronic spiking neural networks

S.-C. Liu, J. Kramer, G. Indiveri, T. Delbrück, T. Burg, R. Douglas 629 Orientation-selective aVLSI spiking neurons

K. Hynna, K. Boahen 645 Space-rate coding in an adaptive silicon neuron

M.-O. Gewaltig, M. Diesmann, A. Aertsen 657 Propagation of cortical synfire activity: survival probability in single trials and stability in the mean

H. Câteau, T. Fukai 675 Fokker–Planck approach to the pulse packet propagation in synfire chain

L. F. Lago-Fernández, F. J. Corbacho, R. Huerta 687 Connection topology dependence of synchronization of neural assemblies on class 1 and 2 excitability

R. M. Siegel, H. L. Read 697 Deterministic dynamics emerging from a cortical functional architecture

S. Thorpe, A. Delorme, R. Van Rullen 715 Spike-based strategies for rapid processing

D. Chawla, K. J. Friston, E. D. Lumer 727 Zero-lag synchronous dynamics in triplets of interconnected cortical areas

P. A. Cariani 737 Neural timing nets

T. Horiuchi, K. Hynna 755 Spike-based VLSI modeling of the ILD system in the echolocating bat

A. Knoblauch, G. Palm 763 Pattern separation and synchronization in spiking associative memories and visual areas

D. H. Goldberg, G. Cauwenberghs, A. G. Andreou	**781**	Probabilistic synaptic weighting in a reconfigurable network of VLSI integrate-and-fire neurons
A. Delorme, S. J. Thorpe	**795**	Face identification using one spike per neuron: resistance to image degradations
C. Leibold, J. L. van Hemmen	**805**	Temporal receptive fields, spikes, and Hebbian delay selection
N. Levy, D. Horn, I. Meilijson, E. Ruppin	**815**	Distributed synchrony in a cell assembly of spiking neurons
F. T. Sommer, T. Wennekers	**825**	Associative memory in networks of spiking neurons
N. Twum-Danso, R. Brockett	**835**	Trajectory estimation from place cell data
M. D. Humphries, K. N. Gurney	**845**	A pulsed neural network model of bursting in the basal ganglia
P. Varona, J. J. Torres, R. Huerta, H. D. I. Abarbanel, M. I. Rabinovich	**865**	Regularization mechanisms of spiking–bursting neurons
M. G. Paulin, L. F. Hoffman	**877**	Optimal firing rate estimation
E. M. Izhikevich	**883**	Resonate-and-fire neurons
K. Pakdaman, S. Tanabe, T. Shimokawa	**895**	Coherence resonance and discharge time reliability in neurons and neuronal models
J. Shin	**907**	Adaptation in spiking neurons based on a noise shaping neural coding hypothesis
G. Lee, N. H. Farhat	**921**	The double queue method: a numerical method for integrate-and-fire neuron networks
N. Iannella, A. D. Back	**933**	A spiking neural network architecture for nonlinear function approximation
M. de Kamps, F. van der Velde	**941**	From artificial neural networks to spiking neuron populations and back again
J. Feng	**955**	Is the integrate-and-fire model good enough?—a review

Volume 14, Number 8 October 2001

CONTENTS

Neural Networks Letter

T. Chen	**977**	Global exponential stability of delayed Hopfield neural networks

Contributed Articles

S. Corchs, G. Deco	**981**	A neurodynamical model for selective visual attention using oscillators
K. N. Gurney	**991**	Information processing in dendrites: I. Input pattern generalisation
K. N. Gurney	**1005**	Information processing in dendrites: II. Information theoretic complexity

D. Tomandl, A. Schober	**1023**	A Modified General Regression Neural Network (MGRNN) with new, efficient training algorithms as a robust 'black box'-tool for data analysis
J. G. Polhill, M. K. Weir	**1035**	An approach to guaranteeing generalisation in neural networks
S. Watanabe	**1049**	Algebraic geometrical methods for hierarchical learning machines
R. Wang	**1061**	A hybrid learning network for shift-invariant recognition
N. Ampazis, S. J. Perantonis, J. G. Taylor	**1075**	A dynamical model for the analysis and acceleration of learning in feedforward networks
T. Hrycej	**1089**	Estimates of average complexity of neurocontrol algorithms
M. Pasquier, C. Quek, M. Toh	**1099**	Fuzzylot: a novel self-organising fuzzy-neural rule-based pilot system for automated vehicles
A. J. B. Travis	**1113**	Real time distributed processing of multiple associated pulse pattern sequences
V. Cherkassky, S. Kilts	**1129**	Myopotential denoising of ECG signals using wavelet thresholding methods
E. Granger, M. A. Rubin, S. Grossberg, P. Lavoie	**1139**	Erratum to ''A What-and-Where fusion neural network for recognition and tracking of multiple radar emitters'':[Neural Networks 14(3) 325-344]

Volume 14, Number 9 November 2001

CONTENTS

Neural Networks Letters

Y. Sakai	**1145**	Neuronal integration mechanisms have little effect on spike auto-correlations of cortical neurons
A. Karniel, R. Meir, G. F. Inbar	**1153**	Best estimated inverse versus inverse of the best estimator

Invited article

Y. Oussar, G. Dreyfus	**1161**	How to be a gray box: dynamic semi-physical modeling

Contributed articles

K. Okajima	**1173**	An Infomax-based learning rule that generates cells similar to visual cortical neurons
C. Feng, R. Plamondon	**1181**	On the stability analysis of delayed neural networks systems
N. Ikeda, P. Watta, M. Artiklar, M. H. Hassoun	**1189**	A two-level Hamming network for high performance associative memory
A. Talukder, D. Casasent	**1201**	A closed-form neural network for discriminatory feature extraction from high-dimensional data
G. Patané, M. Russo	**1219**	The enhanced LBG algorithm
S. Ishii, M.-A. Sato	**1239**	Reconstruction of chaotic dynamics by on-line EM algorithm

A. F. Murray	**1257**	Novelty detection using products of simple experts—a potential architecture for embedded systems
Md. M. Islam, K. Murase	**1265**	A new algorithm to design compact two-hidden-layer artificial neural networks
A. Koufakou, M. Georgiopoulos, G. Anagnostopoulos, T. Kasparis	**1279**	Cross-validation in Fuzzy ARTMAP for large databases
K. A. Nagaty	**1293**	Fingerprints classification using artificial neural networks: a combined structural and statistical approach
H. Wakuya, J. M. Zurada	**1307**	Bi-directional computing architecture for time series prediction
		Book Review
M. Okatan	**1323**	Advances in Synaptic Plasticity: A Compact Account of the New, the Important, and the Interesting
	1327	***Current Events***
